Point Load	4.5 kN
UDL	12.0 kN
Safety Factor	3
System Heights	100 mm to 1500 mm (with Stringer)
Panel Coating	Galvanised Steel Tray
Certified	PSA Heavy Grade
Fire Rating	Class 0

Application

The HD-ET 41 is a strong, versatile PSA Heavy Grade Raised Floor panel engineered to very high standards. It is designed for use in applications where a factory bonded finish is required. This includes applications such as Computer Rooms, Data Suites and Telecommunications.

The panel is unique as it has a protective ABS edge trim fixed to the edge to protect the finish during use. This trim is located and firmly fixed into a slot in the core. It's design is such that the trim cannot be removed during normal use.

The panel suitable for Finished Floor Heights between 150 and 1500mm with stringers .

It can be safely applied in areas where very high or varying floor heights are required without the need for lateral stringers.

A variety of different coverings can be applied to suit your application.
