

Raised Floor Grommets

Circular Floor Grommets designed to fit into Raised Access Flooring panels. Form Aperture in Panel, Drop in Grommet and cables pass securely through aperture in grommet from the floor void. The Grommet is formed from three pieces and this allows the top surface to rotate which exposes or closes the aperture.

Formed from Fire Retardant ABS Rigid Plastic. Designed to be robust enough to walk on without collapse. External Lip allows carpet tile to be trimmed neatly under grommet leaving semi-flush fit in office or computer room environments.

A variety of sizes are available (see chart below). Picture illustrates 3 compartment cable segregation, also available as one continuous slot. Enquire for sizes not listed below.

Code	A	B	C	D
Gt001	62	34	46	38
Gt003	114	84	102	38
Gt004	136	104	120	38
Gt005	140	102	127	38

All Dimensions are in MM.
Aperture forming in panels is available on or offsite if required
